

MISSION

Our mission is to improve athletic performance, speed recovery and reduce pain through the targeted compression and stabilization of key muscles and joints.

ABOUT US

Bracelayer Apparel Ltd. was founded in Whistler, British Columbia, Canada in 2015 out of a need for improved knee support and stability in a compression garment.

bracelayer[®]

- Increase Stability & Balance
- Reduce Knee Pain
- Prevent Injury
- Improve Performance

INSTRUCTIONS

Our compression pants have a unique design which require special care when putting on.

- 1) Bundle the entire leg of the pant and pull completely over toes and foot. Continue to slide over heel until the bottom of pant leg is above the ankle.
- 2) Bundle the perforated neoprene area and pull upwards over the calf until the bottom of the neoprene area is 3-4" below kneecap.
- 3) Take hold of the sides of the neoprene area and in a series of gentle pulls, slide the brace layer over the knee, taking a moment to adjust and smooth out any folds as you go.
- 4) Repeat with other leg and enjoy.

WHAT ARE KNEE STABILIZING COMPRESSION PANTS?

Bracelayer compression pants provide support, stability and comfort to active and recovering knees. Our unique design incorporates a moisture-wicking and antibacterial compression base layer with a stabilizing layer of perforated neoprene around the knee, IT band and hip.

This stabilizing support layer uses lightweight and breathable perforated neoprene to provide advanced compression to the targeted areas.

BRACELAYER[®] | Tri-Tech Support Layer

Bracelayer compression pants also keep your joints and muscles firing at optimal temperatures to help prevent injury and improve athletic performance.

WASHING INSTRUCTIONS

Wash gently in cold water with minimal amounts of liquid detergent and hang to dry. Avoid the use of fabric softeners.

Our compression pants have undergone an antimicrobial treatment to help fight off bacteria and odor. Over washing can cause this treatment to lose its effectiveness and may accelerate the breakdown of the garment. Therefore, we recommend only washing when necessary.
